SHAREPOINT360 APPOINTED TO MICROSOFT® OFFICE 2010 TECHNICAL PREVIEW

Company furthers expertise on SharePoint 2010 to help customers take advantage of SharePoint

SAN DIEGO – July 20, 2009 – [SharePoint360](#), the premier provider of business productivity consulting and hosting solutions, today announced it has been accepted into the Microsoft® Office 2010 Technical Preview program, which offers access to SharePoint 2010. By joining the program, SharePoint360 will gain insights into the upcoming Microsoft offerings and will be first in the market to provide customers with the most-up-to-date knowledge on SharePoint 2010 technology.

With an early look at Microsoft Office 2010, SharePoint360 will test and advance their knowledge on the new SharePoint 2010 features to help customers begin preparing for this business application. The company, a Gold Certified Microsoft SharePoint Implementation Partner, is one of the select users invited to join the Tech Preview program at the 2009 Microsoft Worldwide Partner Conference. Microsoft Office 2010 will be available in the first half of next year.

SharePoint is one of the most widely used business applications with 17,000 customers and 100,000 million licenses. Yet according to Osterman Research, budget, end-user training and IT's lack of SharePoint administration skills hinder SharePoint's efficient use. SharePoint360 specializes in SharePoint hosting and consulting to help organizations collaborate on business projects with a central infrastructure.

"In anticipation of Microsoft Office 2010, the many organizations using SharePoint will want to know what to expect with the release of SharePoint 2010 to help drive business value," said Paul West, principal and co-founder of SharePoint360. "From now until SharePoint 2010's release, we will be one of the few expert sources to offer customer insights on the functionality, navigation and integration of SharePoint 2010, and how to be prepared to take advantage of the new business tool."
